

**.... Your solution for
inductive components**

Company Profile

Year of Establishment: 2004

**Manufacturing Location: Guangdong, Jiang Xi,
CHINA**

No. of Workers: 300 persons

Capacity: 150Mpcs/year

**Quality Standard : ISO9001
TS16949 (in progress)
ISO14000 (in progress)**

Sales office Location: Hong Kong SAR

Sales Analysis

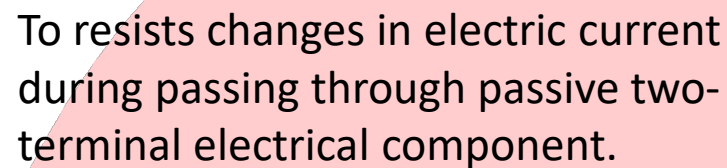

2016 2017 2018

Milestone

We produce the higher performance and reliable Power Inductors by using Elektrisola Copper Wire and High Temperature Epoxy.

Transformer & CMC

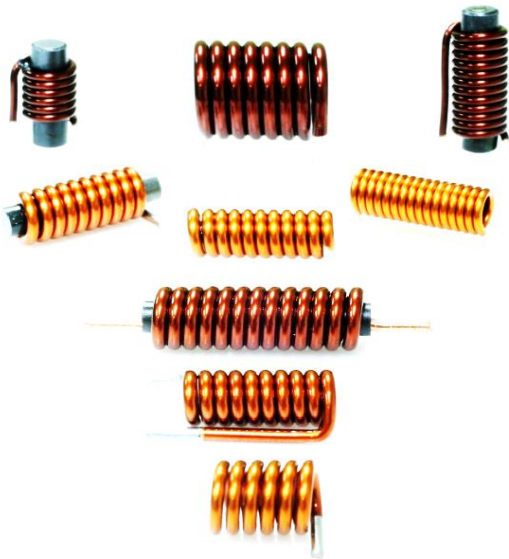

An electrical device to transfers energy between two or more circuits through electromagnetic induction. Or an inductor used to block higher-frequency alternating current (AC) in an electrical circuit, while allowing lower frequency or DC current to pass.

We produce the standard type of Transforms and Common Mode Chokes also capable of bobbin design and custom wound for different applications and purposes.

Rod Choke & Air coil

Customized design for Automotive,
Consumer and Industrial applications.

Reliable and durable products.

Toroidal Coil

Ring-shaped magnetic core of high magnetic permeability iron powder or ferrite materials for a broad range of applications in AC electronic circuits, such as high-frequency coils and transformers.

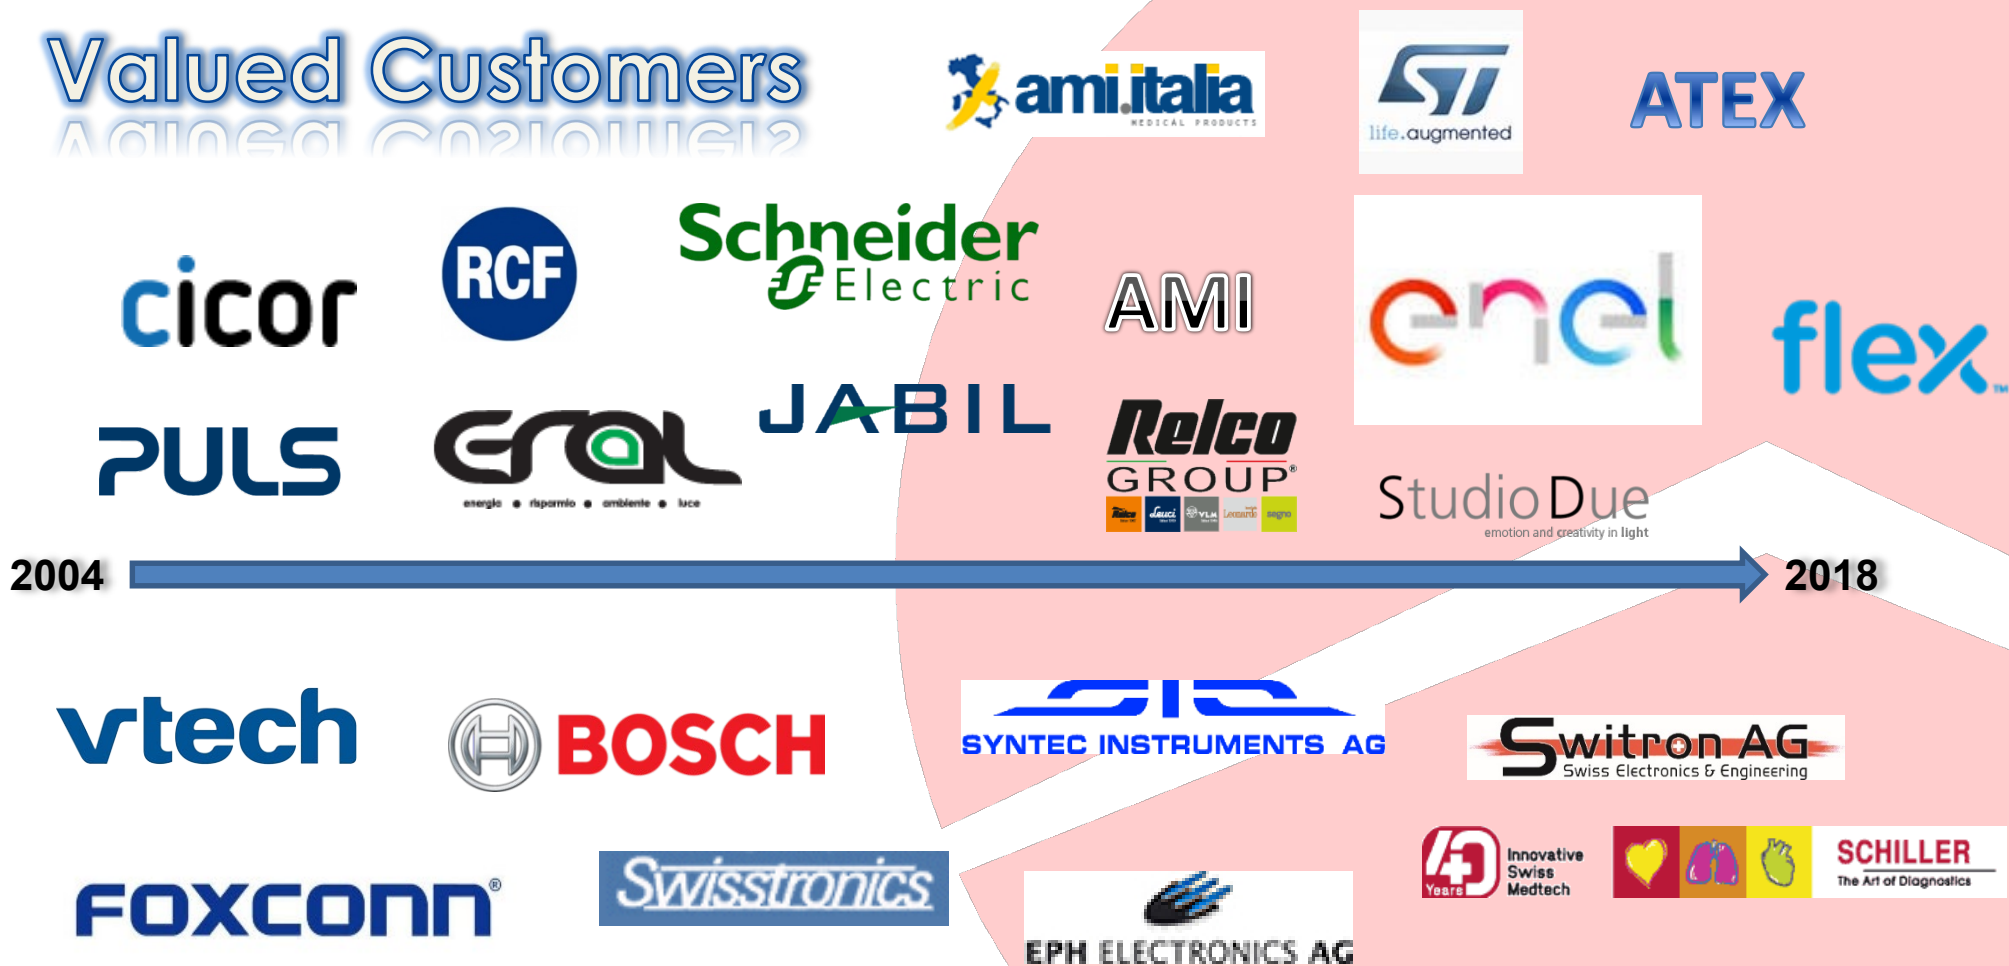

Quality Standard

ISO9001 Certificate

ISO14000 / TS 16969 in progress
